MUJAHID RAFIQ

Software Engineer

+92 305 4142588 | mujaahidrafiq@gmail.com | linkedin.com/in/mujahid-rafique | Lahore, Pakistan

PROFESSIONAL SUMMARY

Full Stack Developer specializing in building and independently owning scalable, production-grade web applications using React.js, Next.js, NestJS, Node.js, TypeScript, MySQL and MongoDB. Delivered end-to-end systems supporting 1,000+ concurrent users, real-time communication with Socket.io, and AI-powered features including OCR and LLM integration, from architecture through deployment on AWS. Skilled in designing secure REST APIs, role-based access control, and responsive user interfaces for high-traffic production environments. Proven ability to independently lead features from requirements through deployment while collaborating across cross-functional product teams.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+), HTML5, CSS3, React Query, Redux Toolkit
Backend: NestJS, Node.js, TypeORM, RESTful APIs, Swagger/OpenAPI, Socket.io, JWT, MFA, RBAC
Styling & UI: Tailwind CSS, Material-UI, Bootstrap, Styled Components, Radix UI
Cloud & DevOps: AWS (EC2, S3, Amplify), Vercel, Netlify, Docker, CI/CD Pipelines, GitHub, Bitbucket
Databases: PostgreSQL, MySQL, MongoDB

EXPERIENCE

Software Engineer, Code Upscale

Jan 2024 - Present

Delivered the following client projects as part of a product engineering team, owning features from design through deployment.

Cervello Logistics — Logistics Management Platform

Jul 2025 - Present | cervello-logistics.com

- Developed a scalable enterprise logistics platform enabling shipment booking, quote negotiation, dispatching, and real-time tracking, with secure role-based workflows across 8+ user types.
- Engineered backend services using NestJS and TypeScript with RBAC to support 1,000+ concurrent users, including authentication flows (email verification, password reset, MFA) and permission-gated navigation.
- Architected scalable microservices (Customer, Quote Manager, Dispatcher) with real-time updates via Socket.io, handling 500+ concurrent live sessions.

Tax Tracker — Expense Management Platform

Jan 2025 - Jun 2025 | taxtracker.pk

- Built an expense management platform with OCR-based receipt scanning and automated record management.
- Developed a responsive React.js frontend serving 5,000+ daily active users with real-time financial dashboards and OCR invoice upload achieving 99%+ accuracy.
- Integrated AI query APIs delivering ~200ms response times for conversational tax guidance.

Cervello Global — Corporate Website

Sep 2024 - Dec 2024 | cervello.global

- Developed a responsive, mobile-first corporate website using React.js and Tailwind CSS.
- Integrated a job listings section synced with Cervello Logistics for direct in-platform applications.
- Built a floating customer support chat module and a custom homepage image slider, improving content engagement by ~20%.

CAITA — AI-Based Mental Health Support Platform

Apr 2024 - Aug 2024

- Built a multi-role, AI-powered mental health support platform delivering CBT-style conversations through a real-time AI chat interface.
- Delivered the UI with Next.js (App Router), TypeScript, Redux Toolkit, Radix UI, and Tailwind, integrated with REST services.
- Customized RESTful APIs via React Query for real-time data updates and configured JWT authentication with role-differentiated access.

STRATA-SFR — Real Estate Investment Platform

Jan 2024 - Mar 2024 | stratasfr.com

- Built a real estate investment platform for a US firm using Next.js (App Router), TypeScript, Redux Toolkit, and accessible Radix UI/Tailwind components.

- Integrated APIs via React Query for real-time property data updates and configured JWT authentication for brokers, investors, and admins.
- Increased team productivity by 15% through technical mentoring and skill development training.

KEY ACHIEVEMENTS

- Deployed and managed production applications on AWS (EC2, S3), Netlify, and Vercel with CI/CD pipelines via GitHub and Bitbucket.
- Containerized applications with Docker, improving deployment consistency across environments.
- Reduced application load time by up to 30% using code splitting, lazy loading, and memoization.
- Architected and delivered systems supporting 1,000+ concurrent users and 500+ live WebSocket sessions in production.
- Shipped AI-powered features, including OCR image-to-text at 95%+ accuracy, used across platforms serving large active user bases.

EDUCATION

Master of Science (MSc) in Information Technology

University of Education, Lahore | CGPA: 3.32 / 4.00

Coursework: Data Structures & Algorithms, Database Management, Web Engineering, Mobile Application Development, Machine Learning, AI, Object-Oriented Programming, Java.
